- Take a virtual tour
- How to access it
- 4.3 Interface: the challenge

# Datatel e-learning library: What is it?

The e-learning library is an online collection of about 130 video tutorials that provide need-to-know information about many elements of the Colleague system such as the communication management function.

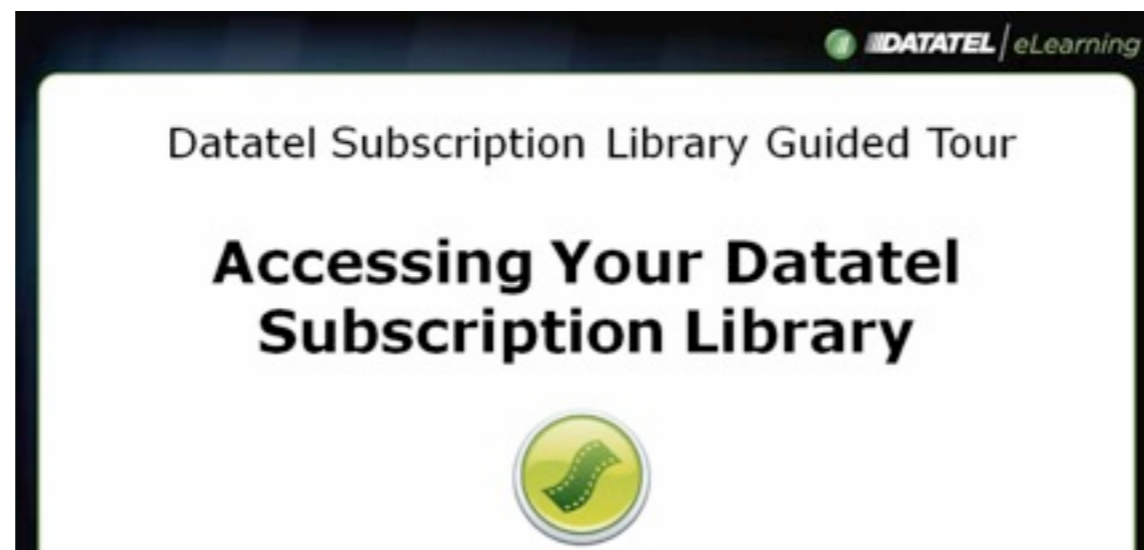

You can access these video tutorials anytime you need them from any location -- as often as you need to.

The videos are organized, or clustered by function so that you can work through an entire sequence, or pick and choose the one that meets your most immediate task need.

The video sets range between 15-45 minutes, and can be viewed in one sitting, viewed in sections, or “paused” to be continued later

# Datatel e-learning library: Virtual Tour

View an overview of the library and how it is organized in less than 5 minutes by clicking on this destination image ...
