Gilsum / Time to plant

Print Page

Published:
Wednesday, June 3, 2009 11:57 AM EDT

Anastasia Healey, right, a 4th-grader at the Gilsum Elementary School, rakes the soil in a raised vegetable bed to prepare for planting seeds. At bottom, she is joined by Cathy Sims, an adult supervisor for the program, and Lenoir McDougall, an adviser from Antioch University New England. The garden will be a key component of the school's federally funded before- and after-school programs for students by providing vegetables for use at the school and at a local food pantry. The project was sponsored by ACCESS, which will also collaborate with the Gilsum Recreation Department and other schools within the Monadnock Regional School District to offer a summer camp at the Gilsum school July 6 through Aug. 7.
